DETAILED ACTION

Allowable Subject Matter

Claim 1 –2 is allowed.

1. The following is a statement of reasons for the indication of allowable subject matter: prior art fails to show an electrical energy generator device having an array of micro-fans each associated to a dynamo electrical generator by means of a connecting shaft provided with a lug element which mechanically co-operates at each revolution with a piezoelectric element, for the production of additional electrical energy.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by Change(US 5223763).

Change disclose in fig.1 an electrical generator having: one or more plates(47) of piezoelectric material(35-45) positioned in the direction of a flow of air within a conduit(13) for conveying air in such a way that the plates are forced to vibrate by the flow of air(fig.1 wind) consequently produce electrical energy.
